

How to create questions for experts

Contacting experts is a necessary action need to create and improve your project! For more information, see the video “How to find experts,”

When creating questions for any expert interview, think about this:

- What do you want to know?
- How does your problem affect the expert and their work?
- What's the impact of your issue and solution?
- Why is your product important?
- What statistics do you or your expert have? Why are they impactful? - STATISTICS ARE VERY IMPORTANT!
- What else do they recommend?
- Ask for any other feedback, and if they know anyone else that could help!

Knowing what to ask experts in the interviews can be hard, but essential! Hope this video helped and gave you ideas.

General Examples:

- How would our project affect your workplace?
- How would our project be used in our places?
- What changes would you suggest to improve our design?
