How to improve team fun

If you're looking for how to improve team friendships and improve productivity while having fun, you need to figure out a plan of activities.

Team games outside of practice
Plan a 30-45 game time with your team outside of practice! Among us, Roblox, Brawl Stars, etc. any fun game everyone can play!

Team Fun Chat
Another idea is a team chat for outside of practice and non practice things. This will improve core values on the team. It also helps the team stay more on topic during practice and helps you to all get to know each other and form friendships!

Core Values Games
Try playing core values games during practice; a fun game like blooket or gimkit on core values or the game board can be fun AND help you learn about the season! There are many fun core values activities on the internet if you google them!

Celebrating
Celebrate accomplishments - Having a team dinner to celebrate after competitions (We like to go to Culver's, our favorite local custard restaurant.), high fives, and accomplishment meetings, where everyone shares what they got done that practice.

It is important to have fun and have good team relationships, as well as having fun OUTSIDE of practice! Our team recommends listening to Teamwork makes the Dreamwork - by FLL!
